September 8th, 2009
FOR IMMEDIATE RELEASE through October 3rd, 2009

MINDSPIRAL RETURNS TO FISKE PLANETARIUM FOR A SPECTACULAR LIVE SPACE MUSIC CONCERT WITH LASER SKY SHOW!

Nashville, TN... Space music guru, Tony Gerber (Cypress Rosewood in Second Life), visits the Fiske Planetarium in Boulder, CO for the first time as a musical partner with Boulder local electronic music fixture, Mike Metlay, and his mindSpiral project. This must see, must hear event is slated for Saturday, October 3rd at 7:00 pm. MindSpiral is a kid friendly show and tickets are only \$10 at the door for this exciting live music event complete with the laser show magic of the planetarium.

Since 2005, Mike Metlay's electronic music project mindSpiral has been wowing audiences at the Fiske Planetarium, with exquisite performances of live electronic space music accompanied by a live sky show with laser projections. mindSpiral's calendar for 2009 has one more concert at the Fiske, and it's going to be amazing.

Tony Gerber is famous in the space music arena: founder of Space For Music Records, successful recording artist both as a soloist and as part of the popular live-music ensemble SPACECRAFT (whose music has appeared in the Tom Cruise film VANILLA SKY), and groundbreaking "virtual reality" artist in the online world of Second Life, where in his guise as Cypress Rosewood he has played hundreds of concerts for audiences around the world. Tony brings his magical touch on keyboards, guitars, native flutes, and electronics to the Fiske as Mike's partner for this latest incarnation of mindSpiral.

The evening promises to be full of soaring, uplifting spiritual space music of a sort rarely heard in Colorado, fun and exciting for listeners of all ages, with the Fiske's famous visuals providing an inspiring backdrop for mindSpiral's live music... including a guest appearance by Fritz, the Fiske's famous Zeiss planetarium projector, who will rise from his hibernation pit to join Tony and Mike under a starry and laser-lit sky.

It's like nothing you've ever heard before. It's not to be missed. It's mindSpiral — Space Music With A Smile!

INFORMATION ON MINDSPIRAL:

mindSpiral is the brainchild of Colorado-based electronic space musician Mike Metlay, who brings with him a 30-year career as an artist, producer, bandleader, community-builder, and event organizer in the realm of experimental music. While Mike is most famous for the Different Skies concerts at Arcosanti, Arizona, he has gained critical and popular acclaim for the concerts he does at home for his local audience under the name mindSpiral.

mindSpiral has been described as "Mike, plus anyone who picks up the phone, hears Mike saying, 'Hey, I have this great new musical idea....', and doesn't hang up." Mike reaches out into the world of electronic, experimental, meditative ambient, and space musicians, and selects one or more partners to come to Colorado and create beauty with him.

Past mindSpiral members have included world-famous space musician Giles Reaves, experimental guitar veteran John DuVal, UK-based electronic arts master Nick Rothwell (a.k.a. CASSIEL), tribal-ambient percussionist Paul Vnuk Jr. (of Ma Ja Le), and ambient electronica artists like Tim Walters (of The Doubtful Palace), David Herpich (of Emerald Adrift), and Darrell Burgan (a.k.a. Palancar). Albums of mindSpiral music have been released on Atomic City Records and on the Earth Mantra and Just Not Normal netlabels.

Every mindSpiral experience is as different as the musicians who take part, and the newest incarnation of the project, pairing Mike with space-music master Tony Gerber (a.k.a. Cypress Rosewood), looks to be a stellar undertaking.

More information on this concert, upcoming events, CD releases, Space for Music Records and other creative musical artists can be found on the internet at: <http://spaceformusic.com> and <http://mindspiral.com>
